# OHIO VALLEY FOREST NURSERY.

R. L. McCOY, Proprietor.

Lake, Spencer County, Indiana.

Genuine guaranteed *Catalpa Speciosa* or hardy *Catalpa* seed from the largest forest trees in the Ohio Valley bottoms. We guarantee these seeds to be true *Catalpa Speciosa*. They have been pronounced *Catalpa Speciosa* by the Forestry Service.

We are now making a special price of 80c. per pound. Ten thousand seeds of *Catalpa Speciosa* weigh one pound. With an order of ten Pounds we give instructions how to grow *Catalpa Speciosa* Seedlings. By our method 90 per cent. of the seed germinate and grow. As to the quality of our seed we refer you to Hon. James A. Hemenway, ex-U. S. Senator, Washington, D. C., who has been personally in touch with our nursery and seed work for years and has purchased many thousands of our seedlings.

If you are interested and want to buy in quantities write us. We require cash with orders for ten pounds or less. Satisfactory reference before shipment for larger orders.

Can also furnish Hard Maple seed at 20c. per pound in 100 pound lots.

## WHY PLANT CATALPA SPECIOSA?

AN EPITOME OF FORTY-ONE REASONS.

- |   |  |
|---|--|
| 1. It will grow everywhere within the boundaries of the U. S. except in arid regions. | 20. Immense yield per acre.                              |
| 2. By 1925 American forests will be exterminated.                                     | 21. Excels for building material.                        |
| 3. The only valuable tree which will mature in time.                                  | 22. Equals walnut for carving.                           |
| 4. Is antiseptic; requiring no chemical treatment.                                    | 23. Makes good fence posts.                              |
| 5. It grows in almost any soil.   | 24. For mine timbers not surpassed.                      |
| 6. Easily propagated and managed.   | 25. Ideal wood for shingles.                             |
| 7. Demands no professional manipulation.  | 26. Every quality for interior house finishing.          |
| 8. Most durable wood known.   | 27. Good plow beams and handles.                         |
| 9. Valuable for cross-ties; have endured for half a century.                          | 28. Used for centuries for boat building by the Indians. |
| 10. Nothing better for telegraph poles.   | 29. Suitable for all car construction.                   |
| 11. Miles of living trees used for telegraph lines.                                   | 30. Qualities of ash for agricultural implements.        |
| 12. Makes magnificent veneers.  | 31. Blocks are used for wood engraving.                  |
| 13. Superior to oak furniture.  | 32. Strong and durable piling timber.                    |
| 14. Lighter than pine.  | 33. Less insect enemies than other trees.                |
| 15. Stronger than oak.  | 34. Fewer diseases than other trees.                     |
| 16. Tougher than hickory.   | 35. Once planted becomes a perpetual forest.             |
| 17. Freedom from warping.   | 36. Quick growth for wind break.                         |
| 18. Neither shrinks nor swells.   | 37. A desirable shade tree.                              |
| 19. Makes best wood pulp and book paper.  | 38. Beautiful flowers for ornament.                      |
|   | 39. Roots never clog sewers.                             |
|   | 40. Will produce cross-ties at 20 cents apiece.          |
|   | 41. Practically all uses for which wood is adapted.      |

We are now ready to contract to grow genuine *Catalpa Speciosa* seedlings for fall and winter delivery of 1913 in any quantities. Also Black Locust.
